"I joined TAB four years ago having spent more than 20 years as a business executive and 3 years as an independent business consultant. I was looking for an opportunity to leverage my business experience, reduce my travel, and build an annuity income stream. I could not have picked a more gratifying way to do all three. My TAB Board members have become my friends through shared experiences which have been truly financially and emotionally rewarding. The TAB business model is compelling for many business owners, and it really works. So, I know that I can grow as much as I need to achieve my personal vision. I could not ask for more."
